

Certified Scrum Master (CSM) Course

Overview

Two-day Certified ScrumMaster (CSM) class provides an understanding of Agile principles and teaches the practices that make Scrum effective for delivering projects. Exercises, demonstrations, facilitated discussions, games, and videos are interwoven throughout the course to illustrate the principles being taught.

Our CSM course uses Scrum to teach Scrum. The class is run using sprints. Sprint planning is used to identify the sprint goals and key learning modules for each sprint. Sprint reviews and retrospectives help ensure the students are effectively getting great value from the class.

This course also allows students to claim 14 Project Management Institute (PMI) Professional Development Units (PDUs) which can be applied to Project Management Professional (PMP) and PMI-Agile Certified Practitioner (PMI-ACP) certifications.

Who Should Attend

This course is appropriate for all members of the project team including Project Managers, Product Managers, analysts, developers, testers, and anyone interested in taking a deeper dive into Scrum and Agile methods.

CSM Course Outline

- Agile overview
- Developing solutions using iterative and incremental concepts
- Inspecting and adapting via empirical process
- Scrum framework
- Scrum roles
- Product backlog
- Requirements management and product backlog refinement
- Product backlog items and user stories
- Product increment and definition of done
- Estimation
- Sprint planning
- Task board and daily scrum
- Sprint review and retrospective
- Quality
- Scrum across multiple teams

Certified Scrum Product Owner (CSPO) Course

Overview

Certified Scrum Product Owner (CSPO) training is a two-day interactive learning experience that focuses on the role of the product owner. This course covers concepts in the areas of providing vision, requirements, planning, story maps, innovation techniques, product backlog grooming and prioritization, splitting stories, forecasting and tracking, and common challenges when implementing Scrum and how to address the challenges. These concepts are presented in a highly collaborative format with elements of lecture, classroom discussion, exercises, games, and video interwoven throughout the class.

Our course uses Scrum to teach Scrum. The class is run using sprints. Sprint planning is used to identify the sprint goals and key learning modules for each sprint. Sprint reviews and retrospectives help ensure the students are effectively getting great value from the class.

This course also allows students to claim 14 Project Management Institute (PMI) Professional Development Units (PDUs) which can be applied to Project Management Professional (PMP) and PMI-Agile Certified Practitioner (PMI-ACP) certifications.
